

How to change your CCTV system password within the XMeye app for iOS and Android.

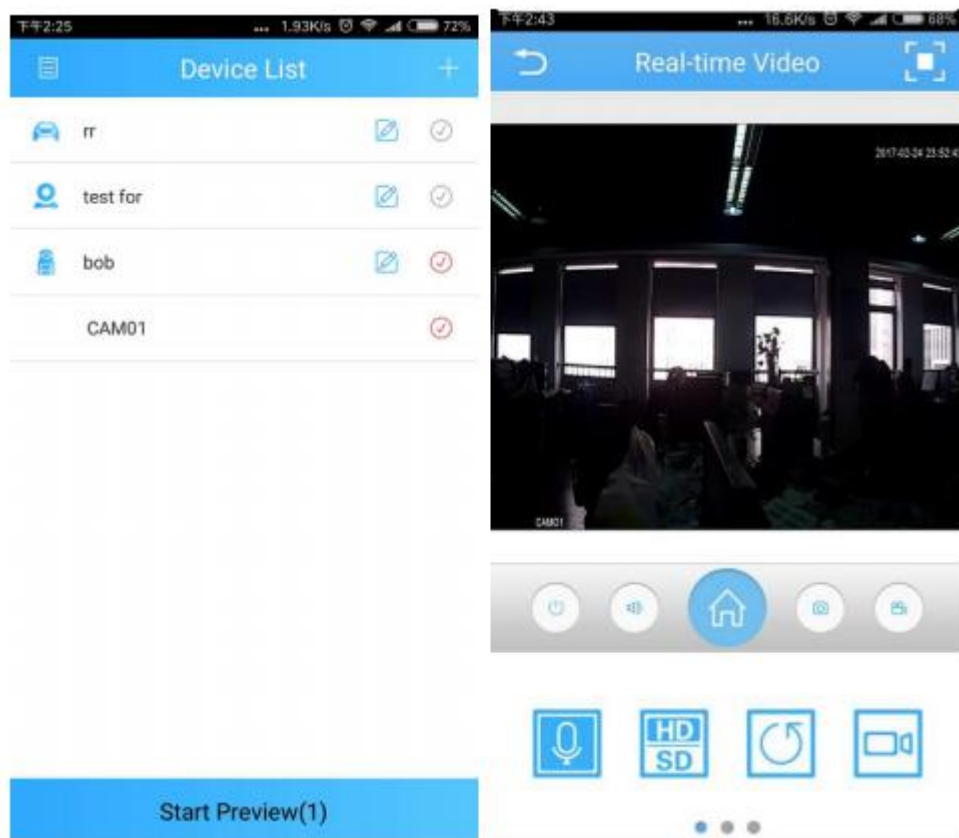

1. Open XMeye app on your mobile device.

2. Go to Local login and click on your device as listed to login to the CCTV system

3. Click the blue house icon in the middle of screen to bring the menu screen up.

4. Click the “Change Password” or “Password” option.
5. Type in the old password (**If there isn't a password currently set – leave the space blank**)

The image shows a screenshot of a mobile application's 'Password' screen. The top bar is blue with a white back arrow on the left, the word 'Password' in the center, and a 'Save' button on the right. Below the bar are four text input fields. The first field contains the text 'admin'. The other three fields are empty and labeled 'Old Password', 'New Password', and 'Confirm Password' respectively.

6. Type in the new password twice in the fields below the old password.

7. Click Save at the top right corner of the screen.
8. Click the back arrow on the top left corner of the screen to get back to the menu and once again to get back to the live view of your cameras.
