# How to update the password in CMS
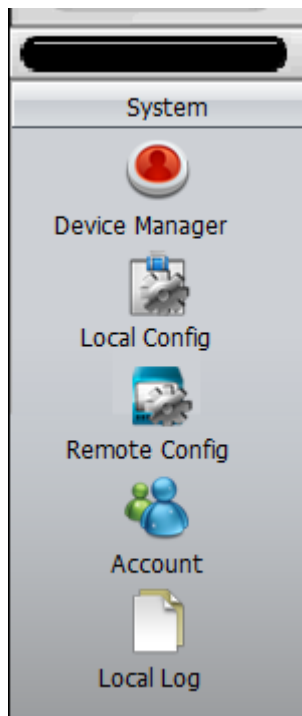

1. **Open the CMS application.**
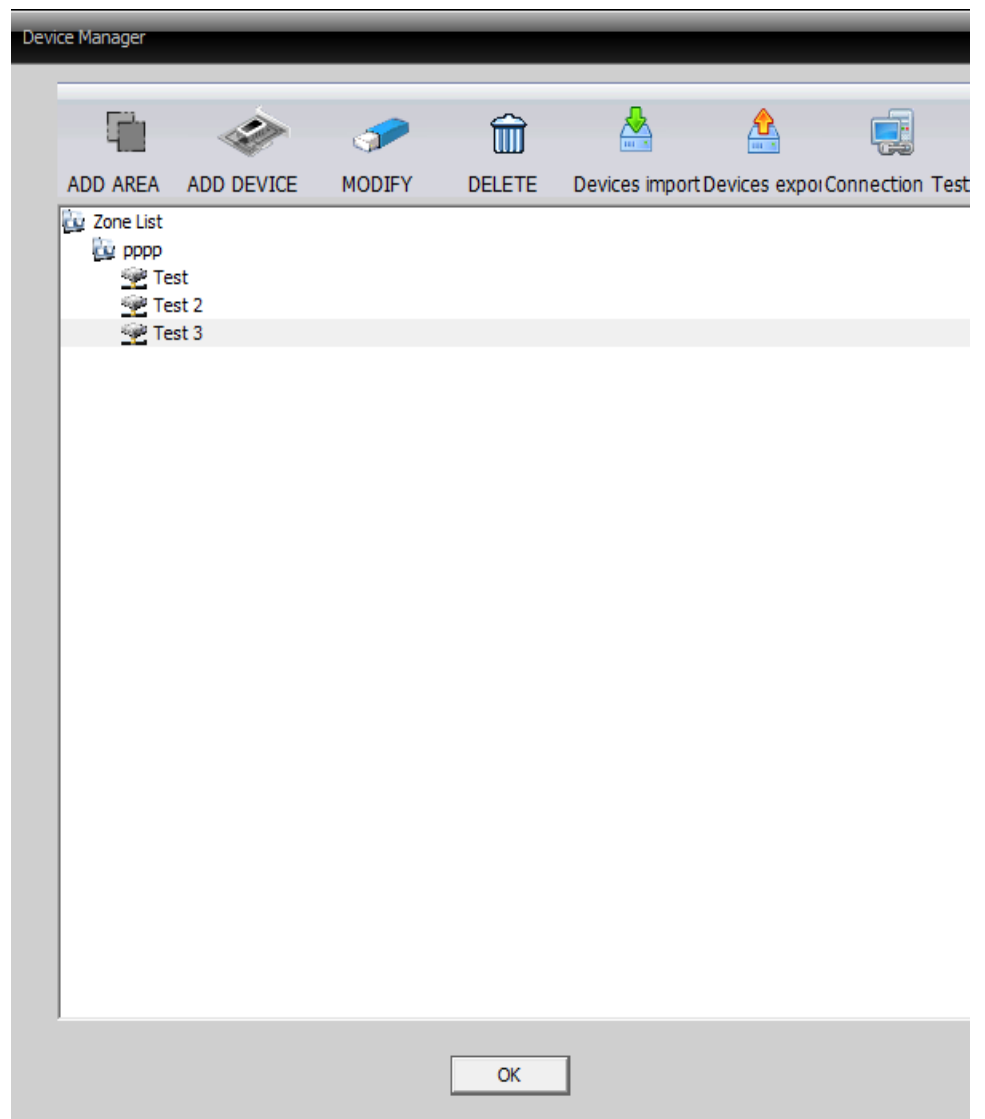

2. **Click Login at login screen.**

3. **Click the System option from the menu on the lower right-hand side of the screen by left clicking on it.**

4. **Then choose Device Manager from the new options that appear above the previous menu by left clicking on it**

System

Device Manager

Local Config

Remote Config

Account

Local Log

5. **In the newly opened Device Manager page, select your device from the list.**

6. **Then in the same page, click on the MODIFY icon at the top.**

Device Manager

ADD AREA	ADD DEVICE	MODIFY	DELETE	Devices import	Devices expol	Connection Test

Zone List
- pppp
  - Test
  - Test 2
  - Test 3

OK

7. **Key in the password you have been given into the Password box and click OK.**

8. **Click OK to close the Device Manager screen.**

9. **That is the password updated in CMS. You should now be able to connect to your DVR as normal in future without entering the password each time you connect.**
